## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winterowd'534 in view of Winterowd'037.

The applied Winterowd'534 reference teaches that it is well known in the art to make and use wood-based products to which an overlay material is attached wherein wood-based products are pretreated with magnesium hydroxide in a carrier. See abstract, column 2, lines 40-50, column 3, lines 25-33, column 4, lines 59-67, column 5, lines 1-15, column 5, lines 33-47, example 2, claims. The Winterowd'534 in the above indicated columns and lines teaches limitations of claims 7-10,,12, 14-23.

The applied Winterowd'534 does not teach that a copper glycine complex should be used in the composition as a stain preventing compound. However, The Winterowd'037 discloses that

it is known in the art to use copper/amine complexes in the stain preventing compositions and teaches the claimed amounts of such complexes used in composition. See abstract, column 5, lines 40-67, column 6, lines 1-18, summary of the invention, column 7, lines 48-55 for amounts used in composition, column 8, lines 1-11. It would have been obvious to one having ordinary skill in the art at the time of the invention to use the claimed copper complex in the Winterowd'534 stain treating composition since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice, In re Leshin, 125 USPQ 416.

The amendments and remarks filed by applicants have been fully considered. The claims, however, remain unpatentable in view of the new grounds of rejections. The inconvenience to the applicants is regretted.
